SENATE SESSION - THURSDAY, APRIL 8, 2021

HB 609, relative to innovation schools.

HB 609

Education: OTP 3-2

**YEA
OTP**

PRO-LIBERTY: This bill permits schools and school districts to pursue innovations in school staffing, curriculum and assessment, class scheduling, use of financial and other resources, and faculty recruitment, employment, evaluation, and compensation.

- This bill would allow public schools to seek waivers from department of education's administrative rules if required to implement identified innovation.
- The bill would allow public schools to explore alternatives that might better meet the needs of students without requiring a statewide change of administrative rules. This would allow local districts to respond more quickly to the potentially unique needs of their community.
