## Mid-Term Rating

---

This is a mid-term rating based on roll call votes in the House and Senate as well as sponsorship/co-sponsorship for a subset of bills that have been included in our Gold Standard liberty voting guides distributed to Senators and Representatives prior to each session. Each bill/vote is assigned an impact score by the NHLA considering the degree to which the bill or vote impacts (positively or negatively) liberty. Weights for both roll-call votes and sponsorship may change in the final rating as the totality of votes and topics is reviewed.

**Pro-liberty bills** protect individual freedom of choice and personal responsibility; recognize the superiority of freedom over coercion; respect the citizen's right of self-ownership; promote governance that is transparent, accountable, and adheres to the Constitution; and recognize the value of voluntary economic decisions.

**Anti-liberty bills** replace self-governance with interventionist regulation; assume rules made by agencies backed by force are superior to voluntary choices backed by personal accountability; and assume a better economy can be managed by a central authority that compels people and businesses to pay for policies they may not willingly support.

The Liberty Rating is the result of hundreds of hours of work by many volunteers who have read and analyzed bills, testified before committees, called and written their representatives, worked on our other signature publication, the Gold Standard, and culled extensive data from legislative voting records. We encourage New Hampshire citizens to learn the facts about how their elected representatives are voting in Concord and to use this tool to hold them accountable. This report card serves as a valuable voter guide when these same representatives are running for re-election.

Motions of OTP (“**OTP**”), OTP with Amendment (“**OTP/A**”), and to accept a Committee of Conference report (“C of C”) pass a bill. If we recommended yea on these motions, it was a pro-liberty bill; if nay, it was an anti-liberty bill. Motions of ITL (“**ITL**”), **Table**, or **Indefinitely Postpone** kill a bill. Interim Study (“**IS**”) will result in the matter being studied and effectively terminates the bill for this legislative session. If we recommended yea on these motions, it was an anti-liberty bill; if nay, it was a pro-liberty bill.

Scores are based primarily on roll-call votes but also include a small modifier for sponsorship score.

## Bills utilized for Sponsorship Score

Sponsorship score acts as a capped modifier on the numeric roll call score. Each bill that appears in the Gold Standard is considered for sponsorship score. Selected bills are assigned a raw impact weight. Anti-Liberty bills have the full weight applied upon introduction. Pro-Liberty bills receive 1/3 of the weight for each step through the legislature - 1/3 for being introduced in a chamber, 1/3 for passing in chamber that bill was introduced and 1/3 for passing in the other chamber. Co-sponsors each receive half credit while the sponsor receives full credit. Finally, the impact of sponsorship score is capped at + or - 5 points with the intent being to allow bill sponsorship to only have a modest impact on the final grade. Sponsorship score allows for legislator accountability even in cases where no roll call vote exists. Note that the sentiment and weight are based on the bill as introduced. Some bills are amended during the session in ways that may vary dramatically as compared to the original text.
